

**Table 1**

**TABLE OF CATEGORIES OF COMPUTERIZED SURVEYING AND  
MAPPING RESULTS**

<b>Category of results</b>	<b>Explanation of results</b>
Control survey data files	<ol style="list-style-type: none"> <li>1. The Ministry of the Interior grants authorization for providing the basic control survey outcome such as the level 1 and the level 2 satellite control survey outcome data, the leveling outcome data and the gravity survey outcome data.</li> <li>2. The NLSC creates files to administer the basic control survey outcomes over the years such as Taiwan triangulation point outcome, Taiwan level 1 benchmark measurement, Taiwan coastland control survey outcome and Taiwan coastland benchmark leveling result.</li> <li>3. The NLSC takes the level 1 and the level 2 basic control points set by Minister of the Interior, Taiwan triangulation point outcome and Taiwan coastland control survey points as constrained point to measure the level 3 basic control points.</li> </ol>
Original numerical cadastre surveying data	The NLSC keeps the original outcome files of the changes on all numerical land surveying due to non land division or merger reasons.
GIS cadastral map data	GIS cadastral map data is the value-add data with the procedure of geometry check, shape modify, format convert, attributes connect. The original data is cadastral map data that built by the NLSC every month with transferred data from computer operating system for land registration, recertification of initial adjudication, land price and land administration, digitization of analog cadastral maps data management system, or from Basic Database of National Land, Ministry of the Interior.
Land-Section Registration data	The NLSC makes use of the land section data from each land administration unit to add value to the land data processing and regularly maintains the land attribute of each section and the peripheral land data.
Scanned file of archive cadastral map	Scanned image data of archive official woodland distribution maps, old cadastral maps, historical cadastral maps, blueprint film and 160gsm blueprint copies of cadastral maps, of the NLSC which are ceased to be updated and used.
Taiwan Electronic Maps data	The national vector electronic map completed by the NLSC, such as map manipulation data of roads, railroads, water system, administrative boundaries, blocks, buildings, important landmarks and control points.
Land use investigation data	Land use investigation data is the classified records of land use category by applying remote-sensing technology, GIS data and field investigation in survey situation.
Basic topographic map data	Basic topographic maps data include 1:5,000 topographic map and the generalization products. 1:5,000 topographic maps are produced by photogrammetric method and field survey. The kinds of generalization products are topographic maps at scales of 1:25,000, 1:50,000, 1:100,000, 1:50,000 and 1:40,000.
Administrative map data	<ol style="list-style-type: none"> <li>1. Administrative maps formed with boundary maps of municipality, county, township and village. Boundary maps are revised according boundary data provided by local governments.</li> <li>2. Land office jurisdiction map is the output integrated and produced by the NLSC according to the land-section registration data</li> </ol>

Ortho-image data	Ortho-image data are the aerial image dealing with rectification and mosaic. The origin image are took by unmanned aircraft system and dealt with photogrammetric method and specifications of Taiwan Electronic Maps production.
Integrated land surveying and mapping data	<ol style="list-style-type: none"> <li>1. The integrated land surveying and mapping data which are produced by the NLSC via application of spatial database related technologies are provided with web service. The list of web services and relevant information are announced on website of Taiwan Map Service (<a href="https://maps.nlsc.gov.tw/">https://maps.nlsc.gov.tw/</a>).</li> <li>2. Web services that include WMS, WMTS, map tile package, Offline maps and open data of Taiwan Electronic Maps at the scale smaller than 1:18,000 follow “Open Government Data License”. The rest of web services follows “Taiwan Map Service Terms of Use”.</li> </ol>

**Table 2****TABLE OF CONTENTS OF COMPUTERIZED SURVEYING AND MAPPING RESULTS**

<b>Category</b>	<b>Item</b>		<b>Format of data</b>	<b>Update</b>	<b>Authorized purpose of use</b>	
Control survey data files	Control survey result files	Elevation survey data	Electronic file	No		
		Gravity survey data				
		Level 1 basic control point				
		Level 2 basic control point				
		Level 3 basic control point				
Original results of numeric cadastral surveying	Original result files of numeric cadastral surveying		Electronic file	No	None value-added	
GIS cadastral map data	Cadastral graph information		Electronic file	Yes		
	Output of cadastral map	A0	Mapping scale	Map product		No
			Special scale			
		A1	Mapping scale			
			Special scale			
A3		Mapping scale				
		Special scale				
Data file of land-section thematic map	Graph information of the land-sections		Electronic file	Yes	None value-added or value added	
	Land-section thematic map	A0	Map product	No	None value-added	
		A3				
Scanned results of archive cadastral map	Copy of archive cadastral map	A0	Map product	No	None value-added	
		A2				
	Scanned file of archive cadastral map	A0	Electronic file	No		
		A2				
Taiwan Electronic Maps data	Numerical data file of Taiwan Electronic Maps		Electronic file	Yes	None value-added or value added	
	Numerical data file of theme layers	Numerical data file of road and rail				
		Numerical data file of river				
		Numerical data file of buildings and blocks				
		Numerical data file of landmarks				
		Numerical data file of traffic network				
Land use investigation data	Numerical data file of land use investigation results		Electronic file	Yes	None value-added or value added	
Basic topographic map data	Numerical data file of topographic maps at scale 1:5000 without overlaying aerial image		Electronic file	Yes	None value-added or value added	
	Numerical data file of topographic maps at scales of 1:25,000, 1:50,000 and 1:100,000			Yes	Open Data	
	basic topographic maps at scale 1:5000 overlaying with aerial image		Map product	No	None value-added	

<b>Category</b>	<b>Item</b>	<b>Format of data</b>	<b>Update</b>	<b>Authorized purpose of use</b>
	1:50,000 scale topographic maps with contour lines and satellite image			
	1:50,000 scale topographic maps without contour lines and with satellite image			
	1:40,000. scale topographic map			
Administrative map data	Numerical data of municipalities and counties boundary map	Electronic file	Yes	Open Data
	Numerical data of townships boundary map			
	Numerical data of villages boundary map			
	Numerical data of land office jurisdiction map			
Ortho-image data	Numerical data of ortho-images	Electronic file	No	None value-added
Integrated land surveying and mapping data	WMTS and WMS published by Taiwan Map Service	On-line service	Online update	None value-added
	WMS, WMTS, map tile package, offline maps and open data of Taiwan Electronic Maps at the scale smaller than 1:18,000	Electronic file		Open Data

**Table 3**

**EXAMINATION TABLE OF PERMITTED APPLICANTS AND METHODS OF APPLICATION FOR COMPUTERIZED SURVEYING AND MAPPING RESULTS**

Category		Permitted applicant	Method of application for none value –added use
Control survey data files	Restricted availability	Government institution	Fill out and submit the application form together with the control consent form to make application.
	Non-restricted availability	Government institution, organization and individual	1. To submit the completed application form in person, by fax or by post. 2. Apply online.
Original results of numeric cadastral surveying		Government institution, organization and individual	To submit the completed application form in person, by fax or by post.
GIS cadastral map data			1. To submit the completed application form in person, by fax or by post. 2. Apply online.
Data file of land-section thematic map			To submit the completed application form in person, by fax or by post.
Scanned results of archive cadastral map			1. To submit the completed application form in person, by fax or by post. 2. Apply online.
Taiwan Electronic Maps			Fill out and submit the application form together with the control consent form to make application.
Land use investigation data	Restricted availability	Government institution	1. To submit the completed application form in person, by fax or by post. 2. Apply online.
	Non-restricted availability	Government institution, organization and individual	Fill out and submit the application form together with the control consent form to make application.
Basic topographic map data	Restricted availability	Government institution	1. To submit the completed application form in person, by fax or by post. 2. Apply online.
	Non-restricted availability	Government institution, organization and individual	Free to use
Administrative map data		Government institution, organization and individual	To submit the completed application form in person, by fax or by post.
Ortho-image data		Government institution, organization and individual	Free to use
Integrated land surveying and mapping data		Government institution, organization and individual	

**Explanation:**

1. Application for value-added use: the government institution and organization may fill out and submit the completed application form for value-added use together with the completed and signed control consent form of value-added use to apply for the authorized value-added use of electronic files of land section data, Taiwan Electronic Maps data, land use investigation data or basic topographic map data.
2. Application for update: an applicant who has applied for computerized surveying and mapping results may apply for update of available data by submitting the completed application form together with other relevant supporting documents in person, by fax or post.
3. An applicant for value-added use may fill out and submit the completed application form for value-added use together with relevant supporting documents to apply for update or addition to the authorized use.
4. An applicant whose application for none value-added use has been completed may apply for the change of none value-added use to authorized value-added within six months. The permitted applicants and methods of application for such change are the same as the requirements for application for value-added use.

Category	Permitted applicant	Method of application for none value –added use
		<p>5.An applicant who applies for reduction or exemption from fees shall fill and submit the application form.</p> <p>6.The data querying and purchasing can process in Taiwan Map Store (<a href="https://whgis.nlsc.gov.tw/English">https://whgis.nlsc.gov.tw/English</a>). The web map service are available in Taiwan Map Service (<a href="https://maps.nlsc.gov.tw/">https://maps.nlsc.gov.tw/</a>).</p> <p>7.Divided into twice applications : People who apply value added “Numerical data file of road and rail” or “Numerical data file of buildings and blocks” in the second half of the year may make twice applications. In the first application, NLSC provides the half of the counties in Taiwan. Applicants should complete the second application before the end of the first season in the next year. The area of second application cover the rest counties of Taiwan.</p> <p>8.Surveying and Mapping results that belong to open data can access and use freely.</p>

## Surveying and Mapping Results Control Consent form

For the purpose of \_\_\_\_\_, I hereby receive (Name of result) \_\_\_\_\_ (refer to the list for details) issued by the National Land Surveying and Mapping Center, Ministry of the Interior and agree to abide by the terms below:

1. I agree to designate specific staff to safekeep the above data and use such data properly pursuant to the purpose of use specified in the application and the Classified National Security Information Protection Act. The aforementioned data shall be subject to handover.
2. Where I mandate another unit to process the aforementioned data, I shall specify in the mandate document that “the mandatory shall designate specific staff to safekeep the data and subject the data to handover. The mandatory may not duplicate the data or deliver such data to another person for use, and shall return the data after the mandated affair has completed.”
3. In the event that I breach any of the above obligations, I shall be fully and solely responsible for all legal liabilities arising from and in relation to the Classified National Security Information Protection Act, Copyright Act and any other relevant law.

# Online Application Procedure of Computerized Surveying and Mapping Results

### Important notes

1. The system is in principle operated for 24 hours. However, in the event that the operation of the system is suspended or shut down due to system maintenance or emergency situation with prior or temporary notice of such interruption of operation, no user may claim for compensation of any form on the ground of interruption of operation.
2. Where the system is accessed via electronic certificate log-in, the NLSC is not in any way liable for any damages arising from the loss or identity theft of such electronic certificate.
3. Map and data which undergo coordinate transformation will be different from the original maps and data. The overlaying results are only for reference of relative spatial positions. To determine the right over the actual boundary of land shall be based on the results of land boundaries supplied by the land office.

## Attachment 3

### Consent Form of Regulations Governing Value-added Use

\_\_\_\_\_ (hereinafter referred to as the “Applicant”) applies for the value-added use of \_\_\_\_\_ (hereinafter referred to as the “Data”) issued by the National Land Surveying and Mapping Center, Ministry of the Interior and agrees to abide by the terms below:

1. Copyright of the data is owned by the Republic of China (representing authority: the National Land Surveying and Mapping Center, Ministry of the Interior). The Applicant may not use the data to apply to another state or area for registration of copyright or any other intellectual property right.
2. The Applicant has the right of value-added use of the Data, and is prohibited from recording, re-selling, donating, leasing or pledging the original data of the Data. In addition, the Applicant may not transfer the right of value-added use of the Data to a third party or re-license the right to a third party.
3. The Applicant may issue or promote the value-added final product or derived product (hereinafter referred to as the “Value-added Product”) by adding value to the Data by oneself or its mandatory without subject to limitation of varieties and quantities. The value-added process may involve change made to the Data by modification, addition and processing as well as development of geographical information applications. Where the Value-added Product is offered to users via internet, the Applicant may not supply users with the original data of the Data.
4. Where the Applicant mandates another unit (hereinafter referred to as the “Mandated Unit”) to add value to the Data, the Applicant shall be responsible for controlling the use of the Data and, after the completion of the value-added process, collecting the original data of the Data which shall not be disclosed to any other person.
5. The Applicant and the Mandated Unit shall designate specific staff to safekeep the Data and subject the Data to handover, and shall properly use and control the Data pursuant to the Copyright Act, the regulations governing the use of surveying and mapping results and the Classified National Security Information Protection Act.
6. Where the Applicant undertakes the value-added use of the Data, the Applicant is prohibited from engaging in any illegal conduct or violating the relevant right of the National Land Surveying and Mapping Center, Ministry of the Interior. In the case of a breach, the Applicant shall be fully responsible for all legal liabilities and compensations.
7. The Applicant undertakes the value-added use of the Data, the scope of value-added use shall be limited to the purpose of value-added use specified in the application form. Where there is any additional purpose of value-added use, the Applicant shall fill out another application form and notify the National Land Surveying and Mapping Center, Ministry of the Interior for future reference.
8. The Applicant shall label the source of the original data as the National Land Surveying and Mapping Center, Ministry of the Interior in an appropriate place of the Value-added Product, and provide three units of the Value-added Product free of charge to the National Land Surveying and Mapping Center, Ministry of the Interior after such Product is completed (where the Product cannot be carried by any media, a document which fully explains the Product shall be submitted). In addition, the Applicant shall take initiative to provide the sales information, such as name of the Value-added Product, name of the original data supplied by

the National Land Surveying and Mapping Center, Ministry of the Interior, the scope of application of the original data, sales volume and production value for the National Land Surveying and Mapping Center, Ministry of the Interior before the end of June and December each year.

9. Where the Applicant violates any of the above terms, the National Land Surveying and Mapping Center, Ministry of the Interior may terminate the Applicant's right of value-added use, and decline to accept any future application for value-added use of surveying and mapping results filed by the Applicant. The Applicant may not request for the return of paid fees.
10. Where the Applicant has any doubt regarding the Data, the Applicant shall raise the doubt in writing to the National Land Surveying and Mapping Center, Ministry of the Interior for examination and handling.
11. The Data supplied are only for reference of relative spatial positions. The National Land Surveying and Mapping Center, Ministry of the Interior does not provide evidence of the precision and accuracy of the Data and shall not be held legally liable in any way. To determine the right over the actual boundary of land shall be based on the results of land boundaries supplied by the land office.
12. The National Land Surveying and Mapping Center, Ministry of the Interior is not liable for any guarantee and damage arising from the Value-Added Product which is produced by the Applicant's value-added use.
